

Special Edition - Public Events Series of the IARC Summer School 2023

Launch of brand-new line-up of live online events

The IARC Summer School 2023 started on 15 May and is being held online and face-to-face, for the first time in the new IARC headquarters building in Lyon.

Two modules are again being offered in the Summer School 2023: **Introduction to Cancer Epidemiology** and **Implementing Cancer Prevention and Early Detection**. Both will comprise a preparatory work phase online, followed by a 1-week period of live sessions on site, enabling epidemiologists, statisticians, physicians, oncologists, and other public health specialists to learn and benefit from IARC's expertise.

IARC is thrilled to unveil a brand-new **Public Events Series**, to be presented live online and in hybrid format during the IARC Summer School 2023. These sessions offer a unique opportunity for anyone to attend online and to learn from renowned experts.
